PROFILE

Full-Stack Developer building for today's AI-driven era — I turn ideas into real, production-ready products and enjoy bringing applied AI into practical, end-to-end systems. I learn fastest by building, and like owning a project from architecture through deployment.

SKILLS

Programming: Python, Java, JavaScript

Frontend: React.js, Next.js, Vite, Tailwind CSS

Backend: Node.js, REST APIs, WebSockets, Socket.io

Databases: SQL, Vector Databases (FAISS)

DevOps & Cloud: Docker, GitHub Actions CI/CD, Vercel, Render, Oracle Cloud, GitHub Pages

AI / ML: YOLO model training (Ultralytics), Computer Vision, RAG (LangChain, FAISS, HuggingFace Embeddings, Llama 3)

Data: NumPy, Pandas, Matplotlib, Seaborn, Plotly

Tools: Git, GitHub, Playwright (E2E testing), Jupyter Notebook, python-docx

PROJECTS

Stickman Online Multiplayer Race — *Real-Time Multiplayer Web App* | [GitHub](#) | [Live](#)

- Engineered a real-time multiplayer browser game using React, Node.js, and Socket.io, supporting **50+ concurrent users** with sub-100ms latency.
- Shipped production deployments via Docker and GitHub Actions CI/CD with Playwright end-to-end tests, achieving **zero-downtime releases** across all updates.

AI Resume Tailor & ATS Optimizer — *RAG-Based Resume Personalization* | [GitHub](#)

- Built a RAG pipeline using **FAISS and HuggingFace embeddings** for semantic matching of resume content to ATS keywords, with LangChain and Llama 3 generating tailored suggestions.
- Engineered a custom python-docx parsing engine (Detect, Replace, Restore) for in-place text edits, preserving **100% of original formatting** and hyperlinks.

AI-Powered Internship Automation Agent — *n8n Workflow* | [GitHub](#)

- Automated internship discovery across Internshala and LinkedIn using n8n and Gemini API, delivering **10–15 curated, AI-filtered listings per trigger** via Telegram with natural-language activation.
- Reduced internship search time from **2+ hours to under 2 minutes per session** through event-driven automation; requires zero manual browsing.

YouTube API Explorer — *Video Entertainment Platform* | [GitHub](#) | [Live](#)

- Built a responsive video discovery platform using React, Vite, and Tailwind CSS with YouTube Data API v3, featuring grid/masonry layouts, dark mode, and modal video playback.
- Deployed on Vercel with a mobile-first, component-driven architecture, using **lazy loading and code-splitting** to optimize load times.

LEADERSHIP & INITIATIVES

- Led GitHub onboarding for **40+ batch peers**, covering repositories, branching, pull requests, and conflict resolution — improving team collaboration across all group projects.
- Managed **3+ academic projects** as Team Lead, driving on-time Agile sprint delivery, task delegation, and cross-functional team coordination.

EDUCATION

GL Bajaj Institute of Management and Technology | **Greater Noida** | 2025 – Expected May 2028

B.Tech Computer Science (AI/ML) — Lateral entry after Diploma in CSE

Accurate Institute of Management | **Greater Noida** | 2022 – 2025

Diploma in Computer Science and Engineering | CGPA: 8.0

CERTIFICATIONS

- Deloitte** – Technology Job Simulation: software development and data analysis workflows
- AWS** – AI/ML & Generative AI: Amazon Bedrock, RAG pipelines, and generative AI fundamentals
- HP Foundation** – AI for Business Professionals: prompt engineering, ethical AI, and business use cases
